Surrender Or Starve: Travels In Ethiopia, Sudan, Somalia, And Eritrea (Vintage Departures)
Synopsis

Robert D. Kaplan is one of our leading international journalists, someone who can explain the most complicated and volatile regions and show why they’re relevant to our world. In Surrender or Starve, Kaplan illuminates the fault lines in the Horn of Africa, which is emerging as a crucial region for America’s ongoing war on terrorism. Reporting from Sudan, Ethiopia, Somalia, and Eritrea, Kaplan examines the factors behind the famine that ravaged the region in the 1980s, exploring the ethnic, religious, and class conflicts that are crucial for understanding the region today. He offers a new foreword and afterword that show how the nations have developed since the famine, and why this region will only grow more important to the United States. Wielding his trademark ability to blend on-the-ground reporting and cogent analysis, Robert D. Kaplan introduces us to a fascinating part of the world, one that it would behoove all of us to know more about. From the Trade Paperback edition.

Customer Reviews

This book details Kaplan’s reporting from the African famine zones in the mid-1980s. While specific events are getting outdated, Kaplan does provide plenty of insight and realism about famine and power in Africa. This book mostly covers developments in Ethiopia, with important details on the
separatist provinces of Tigre and Eritrea. Despite the book’s subtitle, there is only some tangential coverage of Somalia as it related to events in Ethiopia at the time. Note that Somalia’s well-publicized disasters hadn’t happened yet. The same is true for coverage on Sudan, except for the latter parts of the book when obscure struggles in the inaccessible southern parts of the country caught Kaplan’s attention. Also note that this new edition is supplemented with an enlightening update from the newly independent nation of Eritrea.

What matters most in this book in Kaplan’s use of realism when interpreting events in the Horn of Africa, as he has done in all his other books covering various hellholes around the developing world. While the famines in the mid-80s shocked the world, most Western people (and governments) thought that drought was the unavoidable culprit. However, Kaplan proves through ground-level experience that the famines were really the outcome of murderous political policies, as food (and the withholding of it) was used as a weapon by the ruling regimes to control dissident groups, while never-ending civil wars and power politics impeded distribution of aid money and supplies.

Beware that this book nearly collapses in Part 4 as Kaplan analyzes the actions of the US and USSR when the Horn became embroiled in Cold War politics.
