## Customer Reviews

Read it if you can find a copy of this book. Admiral Richard Byrd was an explorer but much of his information was purposefully not published. His discoveries about the North and South Pole are revealing. This is not what you were taught in school. Well the time has come finally for us to find out the truth. The good news is that you and I benefit from knowing it for ourselves - don't you love the age of technology we live in. Nothing, but nothing can hide its secrets now books are freely available, information and knowledge helps resolve issues. There is no ice cap covering the North or the South pole, the earth is hollow. Read on. . .
