International Organizations: Politics, Law, Practice

Synopsis

This leading undergraduate textbook now covers international relations theory in more depth and includes new material on NATO and the EU, while its case studies have been updated throughout. Unlike other textbooks in the field, it takes readers behind the scenes of the world's most important international organizations (IOs), inviting them to ask: What are the legal obligations that give IOs international power? How do IOs ensure compliance from their members? And how do they enforce their rules? *International Organizations* explores these questions through in-depth, chapter-length case studies of the world's key international organizations, allowing students to connect essential IO theory with the law, practice and philosophy of the leading IOs, including the World Trade Organization, the International Monetary Fund and the European Union. Concise and engagingly written and with end-of-chapter questions, legal appendices and suggestions for further reading, this is core reading for any course on international institutions.

Customer Reviews

Good as an informative book for intro. The author has written this text in the way one would write with a vast understanding of the subject matter. This type of writing, which is not simplified, makes it hard to digest the concepts from one sentence to the next. I have had to go back and re-read paragraphs or pages just to get the gist of the concepts since so much information is packed into it. Great intro material wise, but not the best book I have ever read as an intro text to a non-intro class. The case studies make things a bit clearer, but still, I recommend against buying unless it is an assigned read.

Book got here very, very quickly! That was important for this textbook. It had a few too many markings for me, but I knew it was coming that way. Good book, overall!

Good for an introduction to the topic and basic guidance, bad as a book for a non-intro class.

A lot of the pages were stuck together like it had glue or food or something while being used. Not in the best condition like it was advertised to be.
